

Assistant Medical Director, Winnipeg – Great-West Life

Eager to step away from the routine of daily medical practice, grow as a physician and achieve a healthy balance in your career? Join a leading Canadian insurer to build on your medical training, experience and case management skills outside of a clinic setting.

At Great-West Life, the Assistant Medical Director not only reviews rare and unusual cases, but also common cases with uncommon presentations. You can expect to review medical files crossing the spectrums of medical specialties, from across Canada and the world, with opportunities to research unfamiliar diseases and treatments. You'll enhance your knowledge of medicine by seeing how practitioners across the country treat common conditions.

As a member of Great-West Life's Medical Board at our Winnipeg Head Office, you'll work closely with the underwriting and claims departments of our individual and group insurance business units. Your determinations will influence cases in individual disability insurance, critical illness insurance, and group life, health and disability insurance. Occasionally, you will be called upon to act as a medical resource for our Occupational Health Services department.

You'll work alongside five other experienced physicians in a collegial environment, learning and growing in the specialized and fascinating field of insurance medicine. This salaried position features some flexibility in work hours and a benefits and pension package, including a performance-based bonus program.

Rejuvenate your medical career. Contact us for more information.

Take the next step.

Great-West Life provides a challenging, team-oriented work environment, competitive salary and benefits, an appealing workplace with amenities, and opportunities for personal and professional growth.
